Work Experience

Logistics Assistant (Pick Packer) at David Jones

4 months Limited Tenure

- **Picking & Packing**
- **Inventory Control**
- **Quality Assurance Standards**
- **Workplace Safety Procedures**
- **Collaboration in a Team**

Work Experience / Internship at Harvey Norman

1 week with the following teams, learning about their processes, working environment and business practices

- **Service Desk:** How to triage a ticket, learning to quickly separate simple tickets from specialist issues without keeping the user waiting.
 - **End User services:** How a device gets from a box to a fully configured, policy-compliant machine. I covered device imaging, software deployment, account linking and asset registration.
 - **Incident management:** The importance of contingency and disaster mitigation plans when a service down affects hundreds of users. Was given the real example and process of when a Harvey Norman Data Centre was flooded.
 - **ITsec:** What the first 30 minutes of an incident response looks like as how to mitigate potential damage using penetration testing
 - **Server team:** How a server's lifecycle is managed end-to-end. Provisioning, patching, backups, and decommission as well as usage of Virtual servers
-

Certifications/Projects

1. Anthropic Certified Architect Courses

- AI Fluency: Framework & Foundations
- Building with Claude API

- Claude Code In Action

2. *CompTIA+ Course*

- Core 1 & 2

3. *Computer Network: Networking fundamentals course*

- Cable types and management
- Documenting and reporting issues effectively
- Time management and organisational skills in a support role
- Dealing with Malware Practices
- Device Network Practices

Github Projects (CI/CD Pipeline, Automation, Network Scanning, etc)

[My Profile](#)
